

Gulf TREE

You're Invited!

Be the first to give your opinion on a new decision-support tree website that reduces uncertainty when selecting a climate tool.

Join Us

December 14th, 12:30-3:30

St. Petersburg College—Seminole
9200 113th Street North
Seminole, FL, 33772

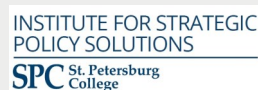

LAST YEAR, we hosted a series of workshops across the Gulf Coast. Stakeholders such as community planners, government agency representatives, and natural resource managers provided input to shape Gulf TREE.

THIS YEAR, we want you to be the first to experience the tool-based search engine designed with you in mind.

The feedback collected from these workshops will ensure that the website fulfills all users' needs and doesn't miss anything.

Let the website's series of questions confidently guide you to the best climate resilience tool or model for your project or jump straight into an advanced search.

Please be sure to register for this workshop using the information to the right.
