

APPENDIX K

HILLSBOROUGH COUNTY CRITICAL FACILITIES INVENTORY

(Listing Provided on CD-Rom)

HILLSBOROUGH COUNTY CRITICAL FACILITIES INVENTORY

Critical Infrastructures Working Definitions

Hillsborough County in coordination with the State Division of Emergency Management maintains a detailed inventory of critical facilities. They represent public and private resources necessary to ensure public safety, emergency response and continuation of mission essential functions.

The list of critical facilities is exempt from public record under Florida Statute 119.07(1) for security purposes. The list and corresponding maps will be provided to federal and state agencies with emergency management responsibilities on CDROM but will not be provided in documents intended for public review.

Telecommunications

The networks and systems that support the transmission and exchange of electronic communications among and between end-users (such as networked computers).

Electrical Power Systems

The generation stations, transmission and distribution networks that create and supply electricity to end-users so that end-users achieve and maintain nominal functionality, including the transportation and storage of fuel essential to that system.

Gas and Oil Production, Storage and Transportation

The holding facilities for natural gas, crude and refined petroleum, and petroleum-derived fuels, the refining and processing facilities for these fuels and the pipelines, ships, trucks, and rail systems that transport these commodities from their source to systems that are dependent upon gas and oil in one of their useful forms.

Transportation

The aviation, rail, highway, and aquatic vehicles, conduits, and support systems by which people and goods are moved from a point-of-origin to a destination point in order to support and complete matters of commerce, government operations, and personal affairs.

Water Supply Systems

The sources of water, reservoirs and holding facilities, aqueducts and other transport systems, the filtration and cleaning systems, the pipelines, the cooling systems and other delivery mechanisms that provide for domestic and industrial applications, including systems for dealing with waste water and fire fighting.

Emergency Services

The medical, police, fire and rescue systems and personnel that are called upon when an individual or community is responding to a public health or safety incident where speed and efficiency are necessary.

Continuity of Government Services

Those operations and services of governments at federal, state, and local levels critical to the functioning of the nation's systems, i.e., public health, safety, and welfare.
